SUMMARY

Experienced **Software Engineer** with **5 years** of **Informatics Engineering** and 4 years as a Full Stack Web Developer specializing in **Angular**, **.NET Core**, **Entity Framework**, **Visual Basic**, **ASP.NET**, and **PHP/Laravel development**. Skilled in creating seamless user experiences for e-commerce, ERP systems, CRM systems, SaaS development, landing pages and control panels. Adept at deploying web applications on different web servers, including IIS and web hosting others. Detail-oriented and organized, I work efficiently under tight deadlines. A proactive team player, ready to contribute to achieving company goals. I am an enthusiastic team player who is ready to contribute to the success of the company.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer *[Angular, Asp Dot Net Core, Vb Dot Net]* **UAE, Abu Dhabi**

Smart Works For Information System **07,2024 - Present**

Developed five high-impact web applications for government and private clients, including an automated **Correspondence System** and a licensing system for the **MOEI**, integrating **AI-driven chatbots** and incorporating **UAE PASS** and **UAE ICP** for seamless user authentication and improved service delivery.

- Architected and developed comprehensive over five high-impact web Applications**,** including a Fully Automated **Correspondence System** for government employees, enhancing communication efficiency **by 40%.**
- **Led** the development of the Ministry of Energy and Industry (MOEI) System, reducing processing time for approvals **by 30%.**
- Advanced AI Integration Spearheaded AI-driven chatbots in web applications, **improving user experience and reducing manual support intervention by 50%.**
- Optimized Database Management utilized SSMS Database for efficient data storage and retrieval, implementing best practices to improve application performance.
- Innovative Use of Technologies with leveraging in Angular, ASP.NET Core, Entity Framework, and VB.NET to develop scalable applications, enhancing performance and security.
- Cross-Functional Collaboration worked closely with project managers, analysts, and QA teams to align with project goals, successfully completing projects within tight deadlines.
- Agile Methodology Implementation Championed Agile practices, **achieving a 70%** increase in project efficiency and adaptability to changing requirements.
- Performance optimization and conducted performance analysis, **reducing load times by 60% and improving application responsiveness.**
- Training and Mentorship training programs for junior developers, fostering a culture of learning and enhancing team competency.
- Served as QA for analysis systems, optimizing strategies for database performance by removing unused indexes, verifying data types, and ensuring proper data table relations, **resulting in improved efficiency and reliability and digging bugs by 85%.**

Germany, Remote

Full Stack Web Developer (Angular & Laravel)

IT-Trendco **04,2021 - 01,2024**

Built an ecommerce SaaS platform for indoor and outdoor restaurant operations and real-time cooker system, developed over 5 landing pages, and constructed an e-commerce store with admin control panels.

- Leveraged expertise as an entrepreneur to analyze business requirements, gather customer feedback, and implement new features. This strategic approach resulted in a remarkable **40% increase** in the success rate.
- Collaborated closely with cross-functional teams to ensure seamless coordination and adherence to the agile methodology throughout the development process, resulting in a remarkable **70%** increase in project efficiency and performance.
- Boosted meal delivery efficiency by **80%** through the implementation of a **real-time** system using Pusher technology.
- Achieved a **60%** increase in landing page preloading speed by lazy loading section strategies and PWA.

Angular Developer **Saudi Arabia, Remote**

Yesser Recruitment Project **04,2023 - 09,2023**

Worked on **ERP** systems for managing employee, client, and worker information. Managed financial accounts and facilitated worker housing to ensure optimal client contracts.

- Created shared and isolated ag-grid components as templates which short **30% of code time**.
- Enhanced maintainability by **60%** and scalability by **40%** by refactoring the code and using Ngrx Store.
- Implemented agile methodology to help deliver the app release on time with a **success rate reaching 90%**.
- Covered **90%** of the project with unit tests, **decreasing the bug by 30%.**

Full Stack Web Developer ***[Angular, Laravel, Laravel Blade]*** **Syria, Aleppo, on-site**

404 Developers **07,2020 - 04,2021**

Developed a restaurant management system and an E-learning platform.

- Improved coding and debugging by **20%** through building services that handle RestAPIs and validation forms.
- Evolved many projects with a small team such as school management platforms.
- Implemented efficient database queries and optimized front-end components, resulting in a 30% reduction in page load times and an improved user experience.
- Integrated comprehensive error logging and monitoring tools, which led to a 50% reduction in time spent on identifying and fixing bugs.

EDUCATION

BSC in Information Technology ***(Percentage = 84.743%, GPA = 3.7, CGPA = 8.4)*** **Syria, Aleppo**

University of Aleppo **2016 - 2022**

- Achieved a remarkable 92% in my AI-focused graduation project, utilizing neural networks, Genie AI, and computer vision to generate 3D images of fruits from simple sketches.

TECHNICAL SKILLS

- **Front-end Technologies:** Angular, HTML, CSS, SCSS, RxJS, NgRx, JQuery, Laravel Blade, Ajax, ASP.NET Web Forms, Razor.
- **Back-end Technologies:** Laravel,Node js, Xampp, Docker, Apache,Express , ASP.Net Core, ASP.Net,Visual Basic VB.NET, IIS**.**
- **Databases:** MySql, SSMS, SQLite, MongoDB.
- **Programming Languages:** PHP, Python, C#, C++,Javascript, Typescript,Visual Basic.
- **Software Development:** Agile, Trello, Jira, Git, Bitbucket, GitHub, GitLab, Unit Testing.
- **Front-end Development UI:** Bootstrap, Tailwind, Angular Material, Ag Grid Table, Ngx Bootstrap and NG Prime.
- **Integration Services:** Google Maps, Online Payments(Paypal, Stripe), Signal-R, Google Authentication, UAE Pass, UAE ICP, Pusher.
- **Web Hosting & Server Management:** Ionos,Hostinger, Vercel, cPanel, hPanel,IIS.
- **Web Development Techniques:** SEO, SSR, PWA, Webpack.
- **Software Engineering Principles:** SOLID Principle, Design Pattern Modules, MVC, MVVM.
- **Algorithms**: DP, DFS Graph, BFS Graph, Dijkstra Graph, HashMap, Window Slide, Binary Search.

SOFT SKILLS

- **Speaker**
- **Flexibility**
- **Creativity**
- **Analytical**
- **Cooperativeness**
- **Reliability**
- **Leadership**
- **Agility**
